

# SHARMA SCIENTIFIC LLC

FOUNDER-LED QUALITY & LABORATORY CONSULTING | BUFFALO, NEW YORK

Practical quality support for biotech, diagnostics, laboratories and regulated organizations. Nearly a decade of laboratory and quality experience, from bench science to operational systems.

## THREE WAYS TO ENGAGE

|                             |                                                                                                                                                     |
|-----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>01 QUALITY ADVISORY</b>  | Quality strategy, QMS roadmaps, documentation priorities, laboratory workflows, CAPA guidance and scoped fractional support.                        |
| <b>02 QUALITY PROJECTS</b>  | Hands-on SOP development, controlled-document structures, QMS process mapping, CAPA workflows and laboratory quality improvements.                  |
| <b>03 INTERNAL AUDITING</b> | Defined internal audits, process reviews, objective findings, gap reports and corrective-action follow-up; independence assessed before engagement. |

## A SIMPLE FIRST ENGAGEMENT

Focused Quality Systems Gap Assessment: review one agreed process or documentation area, identify priority gaps, and deliver a concise findings summary and practical next-step plan. Scope, fee and timeline are agreed in advance.

## WHY WORK DIRECTLY WITH THE FOUNDER

Ritu Sharma combines experience in cancer biology and gene engineering with laboratory operations and quality management. ISO 9001:2015 certified internal auditor. Clients work directly with Ritu from scoping through delivery.

## HOW ENGAGEMENTS WORK

Discover the challenge → Define scope, deliverables and fees → Deliver practical outputs and handover.

### Discuss a project: [ritu@sharmascientific.com](mailto:ritu@sharmascientific.com) | [sharmascientific.com](https://sharmascientific.com)

Available for defined projects, advisory engagements and appropriate subcontracting opportunities. Experience and credentials described above are those of the founder; Sharma Scientific was established in 2026. Consulting does not guarantee certification or regulatory approval.
